

I strongly oppose Sinclair Broadcasting's decision to air a documentary on its stations that is clearly one-sided and negative toward one of the presidential candidates (John Kerry) only days before the election.

Sinclair's use of public airwaves in an attempt to influence public opinion is not only completely unethical, it is ILLEGAL.

I ask that the FCC require that Sinclair conform to the same laws followed by all other media holdings, and that if they show the documentary, to contest any attempt on their part to renew their license. Our democracy will only remain strong as long as our media continues to serve the public instead of trying to manipulate it.

Thank you for your attention.
